

WASHING		BLEACHING		DRYING		IRONING		PROF. CLEANING	
	Normal process		Any bleach allowed		Tumble drying possible		Max. 200°C		Professional dry-cleaning in tetrachlorethene
	Gentle process						Max. 150°C		
	Normal process		Only oxygen/Non-chlorine bleach allowed		Tumble drying possible - Low temperature		Max. 110°C		Gentle process
	Gentle process		Do not bleach		Do not tumbly dry		Do not iron		Professional dry-cleaning in hydrocarbons
	Normal process	ETITEX GINETEX Belgium European House of Textile , Montoyerstraat 24 bte 14, 1000 Brussels							Professional dry-cleaning in hydrocarbons
	Gentle process								Gentle process
	Normal process	The care labeling system is intended to supply consumers with correct information of the care treatment of textile products, so that the processes indicated on the label will avoid any irreversible damage of the product. The ciphers in the washtub specify the maximum temperature in °C which must not be exceeded. The bar underneath indicates a milder care treatment with reduction of mechanical action, of washing time, by higher water levels, smaller loads, a cool down or combinations thereof and reduced spinning. The five basic pictograms used is subject of international trademarks N° 211.247 and N° 492.423 registered with the World Intellectual Property Organization							Do not dry-clean
	Gentle process								Professional wet-cleaning
	Very gentle process								
	Hand wash								Very gentle process
	Do not wash								Do not wet-clean
